

The SMA50-E extends the capability of the SMA30-E by extending the range of bevel angle to between 0 to 90 degrees and increases cut width up to 5/8". The SMA50-E can mill radius edges between 2 mm and 8 mm (5/16"). Milling heads are easily and can quickly be changed. The built-in spring-pack functions as a shock absorber and allows for a very smooth operation.
