

**Configurations include:**

- **FSC0:** This compact system includes raw material pallet station, product pallet station, pallet changer and movement range of load/unload unit. Product pallet station is fed with skit by forklift.

- **FSC7:** This configuration integrates a 4-, 8-, 12-, or 16-shelf material tower for true lights-out automation.

- **FSC10:** This linear, expanded automation unit allows for the addition of a second material tower for finished parts and up to three lasers to truly maximize production and throughput.

- **River CM-FSC:** Combine the River Navigation's material-handling and inventory-tracking benefits with the compact footprint of our FSC automation system.
