

STN 300 heavy dry grinding machine

The Loewer STN 300 is the advancement of the proved previous model ST 300. It's designed for grinding or deburring sheet metal, hollow section and flat bar.

Key Features

- For grinding short work pieces, the belt conveyor can be changed very quickly to a belt conveyor with 90° stoppers - the smart idea for grinding short pieces
- Constant height of through feed, allows to use roller conveyors either in front or behind the machine
- Available with one or two grinding belt stations or with one grinding belt and one finishing station.

Optional

- Vacuum device to protect conveyor belt when processing thin parts
- Motorized height adjustment incl. automatic thickness adjustment
- Contact wheels in different shores with or without serrations
- Abrasive belts, abrasive nylon belts and brushes in various shores
