

## Flat & Coil Polishing

Autopulit offers two alternatives for bright finishing and/or satin finishing of metal sheets, profiles or flat parts. We manufacture a machine with a moving table or with a moving head. The moving table on machine Model PHA has reciprocating movement with adjustable speed. In the Model CDA, the table is fixed and the working heads move under the rails with adjustable speed. The piece holding tables have capacities from 300 mm x 500mm to 1550mm x 7000mm.

### Coil Polishing Model
